

A close-up photograph of industrial automation equipment, showing various mechanical components, wires, and sensors in a factory setting.

Over the past 90 years, **Beck Automation** has developed into a **globally competent partner for the plastics processing industry**, with removal robots and automation devices for injection molding systems in packaging and medical fields. Regarding the integration of **IML robots**, we are one of the experienced, highly specialized companies on the market.

At Beck Automation Inc., located in Greensboro, North Carolina USA, we are looking for a motivated and dynamic specialist to join our growing team!

Field Service Technician – Full Time Travel

Responsibilities

- Service and repair work on existing systems, most often working alone, with maintaining quality workmanship and precision
- Installation and commissioning of new automated systems
- Handling of training for customers and their technicians
- Assembly and modification of various customer improvement projects
- Preventive maintenance and system optimization on existing customer systems
- Close cooperation with the various internal departments to optimize components, assemblies and functions of systems
- Excellent ability to troubleshoot and determine quick solutions to complex problems, as well as adapt to circumstances and overcome obstacles
- Close work with management, working towards service/parts sales and updates on customer jobs and customer relationship

Requirements:

- Basic technical knowledge of mechanical and electrical assemblies within the automation field
(Past experience as Automation Engineer / Electromechanic with mechanical abilities or degree in mechatronics a PLUS)
- Very hands-on with great attitude and attention to customer relations
- Willingness to travel within US and Canada up to three weeks per month
- Valid driving licence and no issues with air travel

Your advantages - what you can expect from us:

- A lively and modern environment as well as interesting and challenging tasks.
- You will be Carefully trained, given the opportunity for continuous development and benefit from attractive employment conditions.
- Attractive benefits and industry leading compensation (based on experience)
