

Hello Beck Partners!

We at Beck Automation Inc. are very excited to finally unveil our latest offering, ADVANCED TRAINING! We have received TONS of feedback and requests for a more in-depth training experience, featuring more hands-on troubleshooting and repair, along with more knowledge on what makes our system NOT run, and how to fix it QUICKLY!

NOW is your chance to get your technicians the ADVANCED training you always wanted.

Located at our Greensboro, North Carolina Service Center, we are happy to bring dedicated training from our most experienced field service engineers.

ADVANCED TRAINING INCLUDES:

- Continued dedicated attention to your technicians. No interruptions from manufacturing and no lost production
- A structured training course, with a mix of both class room and hands on....with our fully operational in house training machine and NEW specially designed training fixtures
- We simulate real world failures and faults based on our years of experience out in the field. Your techs can “experiment” on our machines so they don’t on yours
- We train advanced HMI function, hands-on machine alignment, Ethercat and wiring troubleshooting, servo and drive belt maintenance, and MUCH, MUCH more
- Along with sharing all of the latest “tips and tricks” for optimized machine performance
- Documentation and troubleshooting guides to TAKE HOME

Our training course will encompass three days at our shop with supplies and lunch included.

All you need to do is get them there!*

Prices start at just \$5500** for up to FIVE technicians. Contact us today for more information and a quote!

*unless otherwise stated in order confirmation, all travel related planning and expenses are responsibility of the customer.

**based for customers with a current BeXpert service contract.
